

## Kimberly Schmid

Strategic Associate,  
North America

### AT-A-GLANCE

➤ Project Management

➤ North America

Kimberly specializes in project management training for organizations intent on keeping pace with the rapid transformations of the global economy.

#### Business Experience

Kimberly draws upon her years in the high-tech industry to create and teach classes that are both engaging and relevant in today's business environment. Specializing in Project Management, Kimberly delivers a dynamic training session uniquely tailored to her client's needs from the fundamentals to the niche situations. Her training sessions help clients establish best practices that work for their own company, culture, client and product so that they can fully utilize the value-add project management offers.

#### Career Background

Kimberly spent 15 years at IBM working across divisions and geographies to deliver high quality products to a worldwide market. She worked on products such as the silicon chip for the Sony PlayStation, the IBM Power Systems server, and the IBM FlashSystem storage device.

During her time at IBM she was certified as a Project Management Professional and as an IBM Executive Project Manager. Additionally, Kimberly implemented supply chain and logistics best practices using Lean Manufacturing and Six Sigma methodologies. Kimberly has a B.S. in Chemical Engineering from the University of Texas at Austin and an M.S. in Management from Rensselaer Polytechnic Institute.

#### Testimonial

"Kimberly is a true partner in learning development. We worked together in the design and collaboration of our Project Management training program. With her expertise, insight and overall approach, we were successful initiating a program that our team members loved."
